

## Extending Multiplication Worksheet

Estimate each product.

1.

$$2 \times \$4.10 \approx \$8.00$$

3.

$$18.4 \times 10 \approx 180$$

2.

$$5 \times \$12.65 \approx \$65.00$$

4.

$$24.7 \times 3 \approx 75$$

Solve.

5. A group of five friends is going to see a movie. If one ticket costs \$8.50, estimate the total price of all the tickets.

$$\$9.00 \times 5 = \$45.00$$

6. About 325 people have picnics at Kennywood Park each day. The park is open 165 days each year. About how many people have picnics at the park each year?

$$300 \times 200 \approx 60,000$$

7. A cantaloupe weighs 1.8 pounds. About how much do 3 cantaloupes weigh?

$$6$$

8. Explain how to round 18.9 to the nearest whole number.

$$(18.9)$$

Since 9 is greater than

$\rightarrow 4$ , change 18 to 19,  $18.9 = 19.0$
